L1: Entry 1 of 3   File: USPT   Oct 28, 2003

US-PAT-NO: 6640145
DOCUMENT-IDENTIFIER: US 6640145 B2

TITLE: Media recording device with packet data interface

DATE-ISSUED: October 28, 2003

INVENTOR-INFORMATION:

NAME	CITY	STATE	ZIP CODE	COUNTRY
Hoffberg; Steven	West Harrison	NY	10604	
Hoffberg-Borghesani; Linda	Acton	MA	01720	

APPL-NO: 10/ 162079   [PALM]
DATE FILED: June 3, 2002

PARENT-CASE:
The present application is a continuation of U.S. patent application Ser. No.
09/241,135, filed Feb. 1, 1999, now issued as U.S. Pat. No. 6,400,996, issued Jun.
4, 2002.

Quick definitions
(*Metadata*)

***noun*:** data about data (Example: *"A library catalog is metadata because it describes publications"*)

Encyclopedia article

Metadata has come to be used to refer to data about data. A good example is a library catalog card, which contains data about the nature and location of the data in the book referred to by the card.

The content combined with its metadata is often called a content package. (continued at Wikipedia)

A virus contained in and spread by a macro language program
that supplements a word processed document or spread sheet.
These are by far the most common type of viruses now, and
they can easily be spread in attachments to e-mail. Never open
an e-mail attachment without running anti-virus software first.
If you need recommendations for good anti-virus software,
ask in the Navigating the Net Message Board

MAE

Metropolitan Area Exchange or Metropolitan Area Ethernet.
A major Internet Network Access Point (NAP) where
different providers and networks hand off traffic to each
other. The two main MAEs in the United States are MAE
East in Washington, DC and MAE West in Silicon Valley.

mailbomb

Flood a single e-mail address with a high volume of mail.
Used to retaliate against an individual or organization that has
bothered the sender(s) in some way. Please note that the
practice violates all ISP user agreements and wastes
bandwidth and resources. Its effects go far beyond the
annoyance to the addressee. Don't try it!

majordomo

One of the common types of E-mail discussion lists. See our
E-Mailing Discussion List FAQ and our Guide to Subscribing,
Unsubscribing, and Searching Mailing Lists.

MAPI

Acronym for Message Application Programming Interface. A
standard Windows interface for messaging that enables
different mail programs and other mail-aware applications like
word processors and spreadsheets to exchange messages and
attachments with each other.

MBps

Abbreviation for megabytes per second.

Mbps

Abbreviation for megabits per second.

mega

Prefix meaning one million (10^6) or in computer usage, the
similar value 1,048,576 (2^{20}). See Number Prefix Table.

meta

A prefix meaning "information about".

metadata

Information about data, or more specifically, the descriptive

information provided in meta tags in an <u>HTML</u> or <u>XML</u> document header about that document.

Active efforts are ongoing to propose standards for machine and human readable metadata to be used with web resources to aid in resource discovery. See <u>Dublin Core</u> and <u>RDF</u>. See also the Instructional Management Systems Project (IMS) <u>Meta-Data pages</u>.

metafile
: A graphics format that combines the features of <u>bitmap</u> and <u>vector graphics</u>. Common types of metafile formats are CGM, Corel Draw CDR files, encapsulated Postscript EPS files, Adobe Illustrator, Word Perfect Graphics WPG files, PICT, and RTF.

meta tag
: In <u>HTML</u> or <u>XML</u>, a tag used in the header of a page to provide information about the page. There may be multiple meta tags in a header, each with different information. In current usage, each tag includes the name of the information and the content that supports that name. As an example, here is an author meta tag:

    <meta name="author" content="Walt Howe">

    Other commonly used meta tag names are description, keywords, date, and copyright. See the article <u>Promoting Your Web Pages</u>.

MIDI
: Musical Instrument Digital Interface. See the <u>Audio Guide</u> and the <u>File Extension Guide</u> for more information.

millenium bug
: The set of problems occurring on January 1, 2000 and other related dates caused by shortsighted programming that coded the years with only 2 digits. Ambiguity arises in the year 2000 as to whether 00 represents the year 1900 or the year 2000, and calculations based on it may fail or produce incorrect results. It can affect software, hardware, operating systems, and devices with embedded software. Another common programming error is failing to account for the year 2000 as a leap year (by the 400 year rule).

MIME
: Acronym for Multipurpose Internet Mail Extensions. The standard for attaching binary files to Internet mail messages. Its usage has been extended to identifying and handling file types encountered by web servers and browsers. Binary types
